VRSpace.org - Bug #191

UserController: authenticated but no avatar

06/03/2024 10:59 AM - Josip Almasi

Description

Apparently user can be authenticated (/authenticated returns true) but have no avatar (/object returns empty string).
Should that happen, client prints
WARNING: user is logged in but has no avatar
to the console.
Maybe triggered by by a server restart or maybe by a server bug.
