| Category: | | Estimated time: | 0.00 hour |
| Target version: | | Spent time: | 0.00 hour |
| Description | | | |
| For observability or AI training or whatever, we need a way to forward each and every request to anything. EventRecorder exists in a space, and stores every request. It does not receive errors though, nor login/logout events, so is of limited use for e.g. analytics. Some kind of session listener would do better. | | | |

History

#1 - 12/11/2024 04:17 PM - Josip Almasi

- Status changed from New to In Progress

#2 - 12/20/2024 11:36 AM - Josip Almasi

- Status changed from In Progress to Resolved

- Assignee set to Josip Almasi

Asynchronous and bathing, feeding only elasticsearch at the moment.

#3 - 01/08/2025 02:20 PM - Josip Almasi

- Status changed from Resolved to Closed
